Adrián Silva

ABOUT ME

I've been developing iOS application for over 4 years professionally, both in large teams of +25 iOS developers and small teams of 2 contributors.
I'm focused on testing oriented methodologies while writing code such as TDD or BDD, also in paradigms such as FP or FRP.
I have a broad experience using RxSwift and Combine with architectures such as MVVM, Redux or TCA.
I'm used to work with agile methodologies such as SCRUM and Kanban, and I enjoy building products from scratch.

EXPERIENCE

Hopin
Dec 2020 – Present | iOS Developer

Hopin is an all-in-one event management platform that aims to Make the world feel closer. I'm part of the founding team behind the iOS App.

FREENOW
Aug 2019 – Dec 2020 | iOS Developer - Driver App

At FREENOW I worked on the Driver Engagement Incentives team. The team was responsible for all things related to engaging drivers to use the app (incentives like bonus points, money…) At the time I worked there the team was following the Spotify Agile model. We heavily used SCRUM, and we were distributed in T-Shaped teams.

We maintained a large codebase with a lot of legacy code written in both ObjC and Swift. The codebase was so big that we decided to modularise it using Tuist. Most of the new code was written following functional patterns with a Redux-like custom-made architecture and RxSwift.

We also had a large set of UITests covering most of the core of the application, and also unit tests.

When developing new features I contributed from the discovery phase in some cases, giving feedback to designers and brainstorming with the team. We used A/B testing with Firebase and Mixpanel as reporting tools.

Quobis
Apr 2018 – Jul 2019 | iOS Developer

- Responsive interfaces with Autolayout

- Development of apps for clients using internal SDKs and WebRTC

- RxSwift and MVVM-C architecture

- Started learning about testing methodologies

EDUCATION

Universitat Oberta de Catalunya
2019 – Unfinished| Computer Engineering

KeepCoding
2018 – 2019 | Mobile Engineering Bootcamp

CPR Daniel Castelao
2016 – 2018 | Higher Techinician in Software Development

SKILLS

iOS Development
Middle Level

Swift   Objective-C   RxSwift   Combine   Redux
MVVM   TCA   OOP   FP   FRP

Other

Kotlin   JavaScript   Git   React Native   Sketch
UX/UI Design   SCRUM   Communicative
Team Oriented
